ACTIONS TO ENGAGE GIRLS INTO PHYSICS

Zélia Ludwig – UFJF
zamadaludwig@gmail.com
What are the reasons why girls do not choose physics at our school?

What parts of science or the science classroom do students find discouraging and why?

Encourage the students to participate in the activities.

Small changes can have an impact.

Understanding the problem

Identifying good practices

Make the difference
Action:

- making or implementing changes;
- information about barriers in your classroom by using the questionnaire;
- share experiences and work together with colleagues to develop ideas;
- measuring the impact of the action;
- engage your colleagues in the projects;
- Encourage girls to continue in their science classes and give them things to hold their interest in Physics and other sciences.

- Show students positive role models who are women working or teaching in Physics.
