

Zoom protocol:

- 1) Please mute your microphone and turn off your vídeo when you enter. This will help reduce the total bandwidth and avoid interference. If you do not do this, one of the co-hosts will do this for you. Only the speakers and organizers should have their vídeo on.
- 2) There will be a question period after each talk and during the coffee breaks. If you want to ask a question, raise your hand using the option in the Participant List on the bottom of the screen. When the chairman calls your name, unmute your microphone and ask the question. You can also send your question by chat to everyone during the talks. Do not forget to lower your hand after your question is answered.
- 3) Please use chat ONLY for the following reasons:
 - a) You have a physics question that others may be able to answer. In this case, send the message to everybody.
 - b) You have a computer problem. In this case, send your message privately to the co-host Thiago Codinhoto.
 - c) You have a question about the organization of the workshop. In this case, send your message privately to one of the organizers.
- 4) The pdf file and vídeo of each talk will be posted on the website <https://www.ictp-saifr.org/dmw2020/>
- 5) Please update your zoom to the most recent version to be able to use the breakout rooms during the poster session.
