**SCHOOL ON CRITICAL  
STABILITY OF  
FEW-BODY QUANTUM  
SYSTEMS**

by videoconference

The lectures in the school will introduce basic few-body techniques understandable for advanced master's students. Topics to be covered include:

- Few-body techniques using coordinate space for bound and continuum states
- Few-body techniques using momentum space for bound and continuum states
- Universality in few-body systems
- One- and two-dimensional systems

There will be a miniworkshop during the school in which selected participants will present short talks. Applicants who would like to give a short talk should submit a title and abstract before the application deadline.
