The MODEST-27 School is aimed primarily at advanced undergraduate, Master's, and PhD students. The goal of the School is to provide a broad introduction to the main physical processes that govern the formation and evolution of stars and stellar systems.

The program will focus on three core areas: stellar evolution, stellar dynamics, and observational astronomy. Through lectures and hands-on sessions, participants will gain the background needed to engage with current research in astrophysics and prepare for the scientific topics discussed during the following MODEST conference.

This School will be followed by the MODEST-27 Conference, from July 12–16.

Application deadline:
April 6, 2027
